PROJECT OVERVIEWS

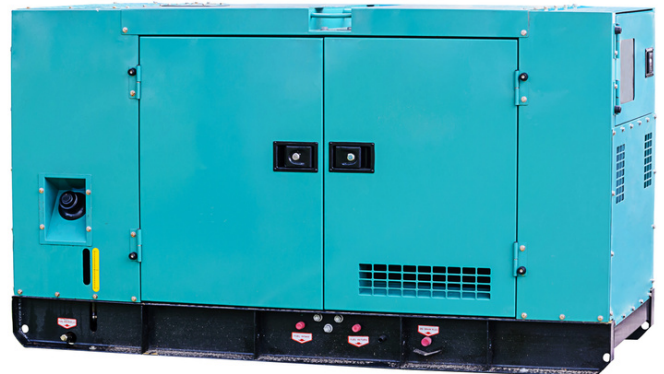

PROJECT OVERVIEWS

GREEN POWER ENGINEERING SERVICE is providing services of electrical & mechanical engineering in the field of power engineering including the supply of standby & prime power generation on diesel & gas gen-set.

GPES is currently carrying out following jobs.

- » Sales of New Gensets in 05KVA to 01MW.
- » After Sales Support Service.
- » Provide Rental Diesel & Gas Gen-sets.
- » Annual Maintenance Contracts.
- » Routine Services of Gen-sets.
- » Top & Major Overhaullings.
- » Installation of ATS/AMF panels.
- » Installation of all type of Controllers & Synchronizing system
- » Manufacturing of c ontrol panels all types.
- » Rental Gensets Supply, Installation, Maintenance, Operations.

PRODUCTS

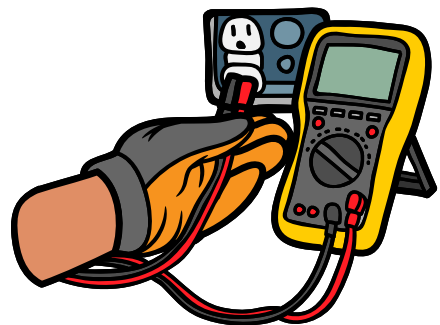

- GREEN POWER also deals with all kinds of diesel & gas gen-sets equipment.
- LUBE OIL
- ALL TYPES OF FILTERS
- SPARK PLUGS
- ATS / AMF PANELS
- CONTROLLER MODULES
- CYLINDER PISTONS
- SWITCH GEARS
- BREAKERS ETC
- SPARE PARTS CUMMINS, CAT, PERKINS & ALL TYPE
- BATTERY CHARGER
- BATTERIES
- GENERATOR CANOPY SOUND & WEATHERPROOF

ELECTRICAL SCOPE:

- **GENERAL ELECTRIC WORK**
- **ELECTRIC CIRCUIT TESTING**
- **UPS SYSTEM WIRING, INSTALLATION**

Automatic transfer switch (ATS) control panels for low voltage with controllers of 0,4 kV to 1600 A. They are intended for automatic switch-over of power supplies in case of failure of the main power supply. Depending on the specific requirements and the project, the ATS control panels can be completed with a contactor circuit, electrically operated circuit breakers, and 3-position electrically operated disconnect switches (load-break switches). Design with a relay contactor control, PLC, or specialized ATS Controller is also possible. Given the wide variety, ATS control panels are manufactured to meet the individual Customer's requirements

SOLAR SYSTEM

GREEN POWER solar systems are designed to meet the unique needs of each customer. The system is comprised of solar panels, mounting structures, inverters, and after sunset the backup system through the battery bank. Our engineering staff will perform an on-site consultation to determine the best size, mounting arrangement, and positioning for your system. Each client is presented with a detailed design and installation plan once this analysis is complete.

PRODUCTS

SOLAR ENERGY SYSTEM
ON-GRID SOLAR SYSTEMS
OFF-GRID SOLAR SYSTEM
SOLAR HYBRID SYSTEM
SOLAR PANELS
SOLAR HYBRID INVERTORS

GOALS & OBJECTIVE

Based on our core values and vision, goals provide specific measures of progress to guide us in achieving results. As a company, we commit to the following yearly goals.

Our goal is to create a product that can help you accomplish your goals, big or small.

Guiding our experience in the best possible way to achieve growth, sustainability and success and making a difference to all customers.

To become the most reliable and professional company in all of our operations and provide customers with the best solutions.
